

uvex super OTG

As visitors' glasses and for day-to-day use

With its ADVANCED OPTICS BY SCIENCE technology, uvex is exploring new avenues in the development of optical reproduction properties above and beyond the current standards. uvex super OTG boasts uvex's cutting-edge lens technology.

It also features hingeless side pieces made of extremely impact-resistant Grilamid® with soft ear pieces. It therefore combines the benefits of temple glasses with the comfort of a headband. The flexible side piece concept means the glasses can be adapted to different wearing scenarios, regardless of whether they are worn together with prescription glasses or not.
