

Lestico LSRL - 1

SAFETY ROOF TOP

**Scientifically designed for complete safety of workers
working on fragile roofs**

Inset : Elevating pads used on excessively inclined roofs and Quick-action clamps used on bolts coated with tar or corroded

The Leslico Safety Roof Top Walk Ladder System distributes the weight of the worker over several saddles to ensure that the weight is transferred equally to the load bearing structure of the roof for the safety of the worker, instead of the fragile corrugated roof. The ladders are so designed that a worker can reach any point from the roof and not necessarily from the apex.

JOSEPH LESLIE & CO. - PIONEERS AND LEADERS IN SAFETY ENGINEERING

The Leslico LSRL-1 Safety Roof Top Walk Ladder is manufactured by Joseph Leslie & Company, leading industrial safety engineers for over 60 years. Joseph Leslie is the parent company of Joseph Leslie Drager - (specialists in high-tech gas detection and breathing protection) and Unicare Emergency Equipment - (specialists in Emergency Eye Washes and Showers). Today Joseph Leslie & Company is synonymous with industrial safety in India.

SAFETY ROOF TOP LADDER

The Leslico Safety Roof Top Walk Ladder System is manufactured from sturdy extruded light weight aluminium provided with a Sliding device, Elevating pads and Quick-action clamps.

This set comprises of :

● Ladder 3m in length	3 Nos.
● Half ladder 1.5m in length	1 No.
● Working platforms 0.6m length	3 Nos.
● Quick-action clamps	25 Nos.
● Elevating pads	15 Nos.
● Safety belt complete with pouch, 3m Life line and Screw hook	1 No.

The system permits a linear coverage of 10.5m from any point on a fragile roof. Working on the platforms is possible upto 1.2m from the ladder path. For working beyond 1.2m the ladder can be adjusted across the roof corrugations.
