

POLE STRETCHER FOLDABLE

All our Pole Stretchers feature heavy duty aluminum poles for easy handling and heavy duty, vinyl-coated nylon covers that resist stains, blood and bodily fluids. Nonslip handgrips help EMTs keep a firm grasp on the stretchers.

Features:

- Folds lengthwise and crosswise for compact storage
- Rugged spreader bars and legs that provide support and comfort.
- Durable, vinyl-coated nylon cover resists stains and will not absorb body or bodily fluids
- Nonsolid handgrips for firm control while handling
- Heavy duty aluminum-alloy poles for easy handling

RESCUE STRETCHER

The stretcher is fabricated from a special plastic grade which is both flexible and durable. Securing straps with steel buckles are sewn onto the stretcher through brass grommets which contribute to the strength and durability. This stretcher is functional in the desert or jungle. It will not break even at -49°C. Can be used for Horizontal or Vertical lifts.

The original and still the best solution for confined space, high angle or technical rescue, and traditional land based applications; this stretcher is a revolutionary design which provides outstanding patient protection and security. It comes equipped for hoisting by helicopter in horizontal position or hoisting in vertical position in caves or industrial confined spaces. When the patient is packaged, the stretcher becomes rigid. The durable plastic provides protection for the patient while allowing extrication through the most demanding confined spaces. The stretcher is rolled for storage in a tough cordura backpack which is included with the system. The system ships at 9 Kg. and comes complete for most applications.

BASKET RESCUE STRETCHER TWO PIECE

Constructed of a high-density polyethylene shell supported by a permanently attached, heavy-duty, aluminum frame. Molded-in runners and handholds make it easy to handle. Chemical, UV, rust, and corrosion resistant. Brass grommets are strategically located for quick use with Adjustable Lifting Bridle. Tag lines should always be used when lifting the basket stretcher. Easily replaceable closed-cell foam pad is attached inside the stretcher for patient comfort. Four two-piece quick-release patient restraints are simple to use and permit the rescuers to easily change the position of the straps to fit each patient.

The Two-Piece back packable Basket Stretcher separates in half for compact storage or backpacking to a rescue site.

Features:

- Ideal for most rescue situations.
- Brass grommets strategically located for quick use with Adjustable Lifting Bridle
- Molded runners and handholds make it easy to handle, even over rough terrain.
- Constructed of a high-density shockproof polyethylene shell, supported by a permanently attached, heavy-duty aluminum frame
- Closed cell foam pad is attached inside stretcher for patient comfort.
- Chemical, UV, rust and corrosion resistant
- Separates for compact storage or backpacking to rescue sight
- Stretcher halves store nested together.
- Stretcher is quickly assembled and secured with pins.
- Equipped with adjustable footrest with ample surface

UNIVERSAL HEAD IMMOBILIZER

Universal Head Immobilizer is simple to use, lightweight and easy to clean. Composed of two plastic-coated, closed-cell foam head supports, a universal attachment base and two durable head straps. Base plate fits all our aluminum and plastic backboards. Head supports can be used on standard backboards, or turned around for use on any Scoop Stretcher.

Features:

- Unique head strap is designed to conform patient's forehead.
- Large ear holes for monitoring the patient
- Minimal interference with X-ray, MRI, or CT procedures
- Waterproof plastic coating makes it easy to prevent bacterial growth within components.
- Will not absorb blood or bodily fluids
- Easy to clean and decontaminate between uses

INSTAHOLD BUOYANT BACK BOARD STRETCHER

Instahold is a backboard stretcher with two handles at a tapered end to allow for more stable transport. The head area is smooth to insure all head immobilization devices adhere to the board and the edges are angled for log-rolling. Strong, lightweight, one-piece HDPE construction is impervious to all bodily fluids, is easy to decontaminate, and provides 100% x-ray translucency. This board is also buoyant and can be used to float a patient in water. Guaranteed for life under normal usage.

Features:

- Two handles at tapered end to allow for more stable transport
- Head area is smooth to insure all head immobilization devices adhere to the board.
- Angled edges for log-rolling
- Floats 70 Kg. in water
- One-piece, high-density, polyethylene plastic construction, with polyurethane foam fill and greater density around the handholds
- Impervious to all bodily fluids
- 100[%] X-ray translucent
- All boards meet OSHA recommendations and are easy to decontaminate
- Guaranteed for life under normal usage

STAIR CHAIRS - FOLDABLE

Designed to be stored in small places, the Stair Chair functions well in confined areas such as narrow hallways and multiple-landing stairways. Two rear stationary wheels and two low-profile front guide wheels allows to roll over most carpeted or hard surfaces. Four lifting handles with nonslip handgrips enable EMTs to move the patient safely and easily. Soft vinyl-coated cover is simple and easy to clean, resists blood, stains and bodily fluids. Locking safety latch maintains it in the chair position during use. Safety latch is manually released when the chair is folded for storage. Quick release patient restraint securely holds the patient.

Features:

- Made from Light Weight & very high duty Aluminium Alloy
- Safe & Reliable.
- Specially designed for confined areas such as hallways or multiple-landing stairways; anywhere access is severely limited
- Two rear stationary wheels and 2 low-profile front guide wheels facilitate transport on most floor types.
- Locking safety latch maintains chair position during use.
- With Folding Handles to minimize storage space
- Can be folded and placed in ambulances, First Aid Rooms, etc...

NEIL ROBERTSON STRETCHER

The Neil Robertson stretcher is designed for removing an injured person from spaces wherein access, doors, or hatches are too small to permit the use of regular stretchers. Spaces such as engine-room spaces, Cargo holds, Pump rooms, Boiler room etc. are few examples of such compact spaces on ship. The Neil Robertson stretcher is made of flexible semi rigid canvas and can be folded easily when not in use or during accessing small spaces. The stretcher is provided with strong straps which when firmly wrapped around the victim, give strong support to hold the person with almost negligible movement with respect to stretcher, which is very important when rescuing or transferring injured person. The stretcher straps are such made that when tied up over the victim, it covers the person in mummy-fashion, giving sufficient support

Features:

- The victim is tied up firmly with the stretcher, avoiding unwanted fall.
- Can be removed vertically from confined spaces like hatches etc, as victim is secured with the stretcher.
- When a life line is tied to the stretcher, unwanted swaying can be avoided.
- Easy to use and bring to the accident site.
- Light weight and ready to use

CARRY SHEET

A lightweight and carry sheet designed for emergency personnel evacuation. The MOBILIZE CSR 801 Carry Sheet stretcher is widely accepted as a vital aid in the rapid evacuation of non-ambulance patients from hazardous situations. Casualties are carried via the ten large wrap-around hand loops. It is instantly available in emergency situations. Constructed of heavy-duty rip-stop PVC vinyl, the Carry Sheet stretcher is easily cleaned and reusable. Can be folded and enclosed in a carry bag.
